CSE- PDTI

Preferred Dental Technologies Inc. (“Company”) (CSE: PDTI): announces President Erik Siegmund interviewed by industry leading research firm

PDTI today announced that they were mentioned by name in the latest leading dental 3D printing research report titled *3D Printing in Dentistry 2018* issued by SmarTech Publishing, the leading industry analysis firm for the 3D printing industry.

Mr. Erik Siegmund, President stated "We are honored to have received a name mention in the report. We are one of only three companies mentioned by name in this prestigious publication. I am greatly encouraged by the recognition we have gained on the world stage amongst all the other dental implant companies"

“SmarTech is encouraged by the efforts of a particular group of innovative dental implant solutions companies, to include Preferred Dental Implants, who are taking steps to further the acceptance of 3D printing technologies in the fast-growing area of implantology” commented Scott Dunham, SmarTech’s Vice President of Research and primary author of the study. “Print technologies have already had a massive impact on the dental prosthetics market, but as demand for implant-supported restorations grows worldwide, it will be up to companies like Preferred Dental to bring the potential benefits of 3D printing to dental practitioners, and ultimately to patients.”
